PROFESSIONAL SUMMARY

Senior .NET Software Developer with 10+ years of experience engineering scalable C# backends, modern frontend interfaces, and integrating Enterprise CMS and E-commerce platforms. Expert in the full SDLC using ASP.NET Core, React, Entity Framework, and Docker containerization. Proven track record of modernizing legacy systems, building custom digital experiences, and delivering high-stakes platforms in cross-functional Agile environments.

SKILLS

- **Backend:** C#, .NET 6/8, ASP.NET Core Web API, Entity Framework Core, LINQ, SignalR, PHP, Python
- **Frontend:** HTML5, CSS3 (Bootstrap, Tailwind), JavaScript, TypeScript, Angular, React, Blazor
- **CMS & E-commerce:** Umbraco, WordPress, Magento, Shopify, Drupal
- **Data:** PostgreSQL, SQL Server, T-SQL, Redis, Schema Design
- **Cloud & DevOps:** Azure (AKS, App Service), AWS, Docker, Kubernetes, Helm, Terraform, GitHub Actions
- **Architecture:** Microservices, RESTful APIs, Domain-Driven Design (DDD), SOLID Principles
- **Security:** OAuth2/OIDC, IdentityServer, JWT, OWASP Top 10 mitigation, Input Validation
- **Quality & Testing:** TDD, xUnit/NUnit, Moq, k6 (Performance Testing), SonarQube, Integration Testing

PROFESSIONAL EXPERIENCE

Sorvox Groups

April 2022 – June 2024

Lead Software Engineer

- Architected a C# .NET Core microservices ecosystem serving 50k+ daily requests, improving system uptime to 99.99% through robust error handling and Polly resilience policies.
- Designed and maintained complex PostgreSQL stored procedures and materialized views to handle heavy reporting loads, shifting logic to the database layer where appropriate to reduce API latency by 40%.
- Orchestrated production deployments using Kubernetes (AKS) and Helm charts, reducing release times by 60% and ensuring zero-downtime rolling updates.
- Integrated Serilog and OpenTelemetry for distributed tracing, cutting Mean Time To Resolution (MTTR) for production incidents by 50%.
- Authored detailed OpenAPI specifications and developer guides, enabling 3 external partner teams to integrate rapidly with minimal support.
- Mentored 4 junior developers on C# best practices and SOLID principles, and instituted strict code review gates that reduced regression defects by 20%.

Apricart E-Stores Private Ltd

April 2020 – March 2022

Team Lead & Senior Software Engineer

- Engineered high-performance ASP.NET Core backend services handling 10k+ concurrent users, ensuring stability during peak sales events.
- Developed a PCI-compliant payment integration processing over \$1M monthly; hardened security via validation logic and idempotent transactions.
- Implemented automated performance testing pipelines using k6, establishing strict latency budgets for core APIs and preventing performance regressions before release.
- Built high-throughput data pipelines using C# and LINQ to normalize 100GB+ of inventory data, leveraging SQL Server indexing for 95% faster retrieval.
- Managed cloud infrastructure on Azure, configuring auto-scaling rules and resource groups that reduced operational costs by 20% without compromising performance.

Creative Drop DMCC

December 2018 – July 2019

Full Stack Developer

- Rapidly onboarded to a legacy ASP.NET MVC monolithic codebase, refactoring critical paths to .NET Core within the first 3 months to improve maintainability.

- Delivered 5+ enterprise web applications using Angular, reducing client turnaround time by 20% through reusable component libraries.
 - Achieved 90% code coverage by introducing xUnit testing standards, leading to a 30% reduction in post-release bugs.
- Chatcloud.co

February 2016 – December 2018

Startup CTO & Lead Engineer

 - Led the development of a real-time messaging platform using ASP.NET SignalR, scaling to support 5,000+ simultaneous connections.
 - Designed modular client SDKs and JSON contracts, reducing integration time for new B2B clients by 40%.
 - Implemented JWT-based authentication and RBAC, ensuring 100% security compliance for admin ops.

EDUCATION

- The University of Sheffield

Sheffield, UK

MSc Cyber Security and Artificial Intelligence

September 2024 – November 2025

Classification: Distinction

 - **Dissertation:** Comparative framework for post-quantum blind signature schemes. Delivered a multi-language library (Python, Rust, Node.js) with gRPC/REST APIs and a Django analysis dashboard; evaluated performance/security trade-offs with reproducible experiments.
- PAF-Karachi Institute of Economics & Technology

Karachi, Pakistan

Bachelor of Science in Computer Science

August 2014 – December 2018

 - **Final Year Project:** Architected a full-scale carpooling platform with a PHP Laravel + MySQL backend featuring real-time GPS tracking and chat; the mobile app Capacitor.js + React.js + Firebase reached over 10,000 downloads.

PROJECTS

- Secure Assessment Platform Prototype (MSc Capstone)

Architected a secure online exam backend using .NET 8. Implemented strict time-window constraints, anti-cheating audit trails, and encrypted answer storage. Designed to handle concurrent users with Redis session caching.
- Live Ops Configuration Portal

ASP.NET Core admin dashboard for managing feature flags. Implemented granular Audit Logging and RBAC using policies. Auto-generated OpenAPI docs for client teams.
- Metrics and Reporting Pipeline

Data processing service using C# Background Services to export logs and metrics. Configured alerts for error rates and latency thresholds to monitor system health.
- Operational Tools & Automation

Internal tools built with Blazor and .NET for support operations. Included secure user lookup, data correction workflows, and bulk actions with approval gates.

CERTIFICATIONS

- Offensive Security Certified Professional Plus (OSCP+)
 - Offensive Security Certified Professional (OSCP)

Issued: Apr 2025 | Verify

Issued: Apr 2025 | Verify

AWARDS & RECOGNITION

- **4th Place, The Gauntlet: Echo Response (CTF):** Offsec official competition around 9000+ competitors.
- **1st Place, ShefESH Capture The Flag (CTF):** Practical cybersecurity competition focused on web exploitation and vulnerability analysis.
- **ACM-ICPC Regional Finals (Top 10 Finalist & Fastest Solver):** High-ranking performance in an IBM-sponsored algorithmic programming contest.
- **1st Place, Logistic Hunt Speed Programming:** First place in a competitive inter-university programming challenge.
- **Competitive Programming Finalist (15+ events):** Consistent high performer across multiple contests.
